Professional Summary

Full-stack software engineer with experience building scalable web applications and APIs. Skilled in modern frameworks and technologies across the full stack, with strengths in backend architecture, database modeling, and accessibility practices. Quick to adapt to new tools and frameworks, eager to learn, and motivated by curiosity and collaboration. Currently pursuing a B.Sc. in Computer Engineering (expected Dec 2025).

Experience

Full-Stack Developer

MapVx

Feb 2023 – Present, Santiago, CL (Remote)

- Developed and maintained web platforms using Angular, Node.js, Express, TypeScript, TypeORM, and WordPress.
- Designed backend architecture, implemented APIs, and optimized database queries.
- Applied accessibility standards to improve user experience.
- Collaborated in Agile teams to deliver maintainable and performant solutions.

Intern, Backend Developer

MapVx

Jan 2025 – Feb 2025, Santiago, CL (Remote)

- Designed and implemented RESTful APIs for scalable web services.
- Built and deployed backend services with Node.js and Express.
- Optimized PostgreSQL queries and ensured reliable data handling.
- Applied clean architecture principles to improve maintainability.

Intern, Frontend Developer

MapVx

Jan 2024, Santiago, CL (Remote)

- Built a metrics dashboard using Angular and TypeScript.
- Integrated Firebase for real-time data synchronization and metrics tracking.
- Collaborated with the UX team to improve user engagement.
- Applied responsive design principles for cross-device compatibility.

Teaching Assistant

Universidad de Tarapacá

2024 – 2025, Iquique, CL (Presential)

- Assisted in programming, object-oriented programming, and web development courses.
- Guided students in SQL and relational database design.
- Supported robotics workshops with both hardware and software tasks.

Projects

Hyōsei – University Fair Project Evaluation Platform

- Full-stack application with Angular, Node.js, Express, TypeORM, and PostgreSQL.
- Implemented authentication, evaluation workflows, dashboards, and data export features.
- Currently extending the system with a GraphQL API for flexible queries.

LifeBoard – All-in-One Productivity & Entertainment Hub (In Progress)

- Next.js Progressive Web App featuring productivity tools, entertainment tracking, finance management, and real-time updates.
- Backend developed with NestJS and GraphQL.
- Integrated third-party APIs such as Spotify and Google Calendar.
- Deployed to Vercel, Railway, and Firebase.

Technical Skills

Languages: TypeScript, JavaScript, Java (learning), C#, Python (basic), SQL, NoSQL

Frameworks: Angular, Next.js, Astro, Node.js, Express, TypeORM, NestJS (learning)

Databases: PostgreSQL, MongoDB

Tools: Git, GitHub, Docker, Vercel, Firebase, Railway, Ubuntu Server

Other: GraphQL (learning), REST APIs, Accessibility (WCAG), Agile methodologies

Languages

Spanish: Native

English: Professional Working Proficiency (B2–C1)

Japanese: Basic (Learning)
